

Bremo Power Station On-Site Lined Landfill

Overview and Project Description

Consistent with our core values, we have placed a great deal of focus on safety for personnel working on the North Ash Pond closure and the neighboring communities.

Legislation passed during the 2019 Virginia General Assembly requires Dominion Energy to remove all coal ash currently stored in the North Ash Pond at Bremo Power station within 15 years.

In keeping with the statute, Dominion Energy has submitted rezoning and Special Use Permit applications to Fluvanna County with plans to construct and operate a state-of-the-art, lined landfill on Dominion Energy property beside Bremo Power Station.

As part of these applications, Dominion Energy has offered proffers of funding to Fluvanna County to mitigate any potential impacts, including:

- Assurance of safe and reliable potable water source for the FUSD
- Community park, recreation, and/or green space areas
- Upgrades and/or maintenance for Bremo and West Bottom Roads
- Opportunities for local workforce

Key Facts

- 6.2 million cubic yards of coal ash is stored at Bremo Power Station.
- The ash will be transferred from its current location in the North Ash Pond to an adjacent state-of-the-art lined landfill.
- Coal ash will not be transported on public roads.
- The proffers provide a framework for safeguarding our neighbors while providing access to new and existing recreational areas in lieu of those previously shut down.
- Landfill construction and the transfer of coal ash is expected to take approximately 10 years.
